Modesto Milling Organic Equine Supplement

Pellet is a “ration balancer” - a flexible, nutrient-dense feed with a comprehensive complement of high quality protein, micronutrients and digestive aids to fully balance a ration with forage for horses and ponies. Contains organic coconut meal, flax and rice bran to reduce the starch content. Does not contain any molasses, soy, corn, or wheat for horses with sensitivities. Can be fed with forage alone or forage combined with other feed products. Options for complementing forage in a ration are:

- By itself as a low-calorie/low-starch, balanced feed
- Combine with organic oats and/or other grain to make a higher calorie balanced organic horse feed
- Combine with non-GMO beet pulp and/or organic alfalfa pellets to make a low-starch horse feed.
- Combine with organic oats, organic alfalfa pellets and/or non-GMO beet pulp to make a senior horse feed and serve as a mash if the ability of the horse to chew is diminished.

Feeding directions

The recommended feeding rate for Modesto Milling Organic Supplement Pellet is:

Feed 1.5 oz. per 100 lbs. body weight per day or 100 g per 100 kg body weight per day (for example: feed 1 lb. per 1100 lb. horse daily)

Do not feed more than the recommended feeding rate. Always supply the horse with a minimum of 1.5% body weight in forage daily and clean, fresh water. Free choice salt is recommended.
